Welcome to contribute to:

World Scientific Series on Probability Theory and Its Applications

The series aims to publish research monographs and advanced textbooks on all aspects of probability theory and stochastic processes as well as their applications. The principal objective of this series is to provide up-to-date overviews and methodologies for researchers and graduate students in the related areas.

The series will cover, but not limit to, the following fields:
- Stochastic processes
- Stochastic analysis
- Markov processes
- Other topics in probability
- Applications of probability
